What Machines Can Be Tracked By Telematics?

- Every Versatile tractor built in 2022 and after come equipped with factory-installed telematics
 - 4WD tractors (wheeled and DT)
 - MFWD tractors above 250 HP
 - Nemesis MFWD tractors
- NOTE: Other telematics systems will not feed data into CBX, and vice versa, at this time

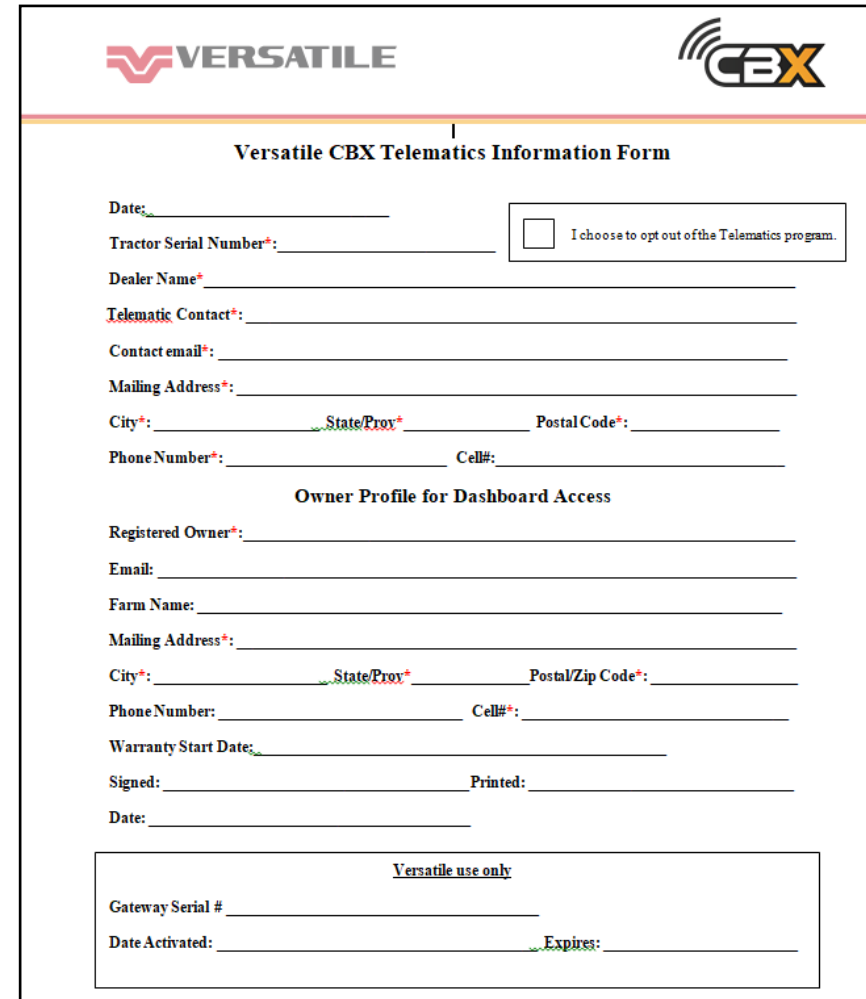

How Many Tractors/Users Can I Add To My Account?

- There are no limits on the number of tractors you can track with your telematics system
- If you have “Sub-Orgs” below your main operation, you can organize your equipment into those Organizations
 - You have multiple farmyards that you manage as independent operations
 - You have a dealership with multiple rental fleets operating out of different stores
- To see the equipment below your Organization, select
 - “Include Ecosystem Assets” in the Organization->Assets table
 - Add Filter for “Suborg Assets” in the Asset List on the Map View

How Do I Add A CBX-Equipped Machine To My Account?

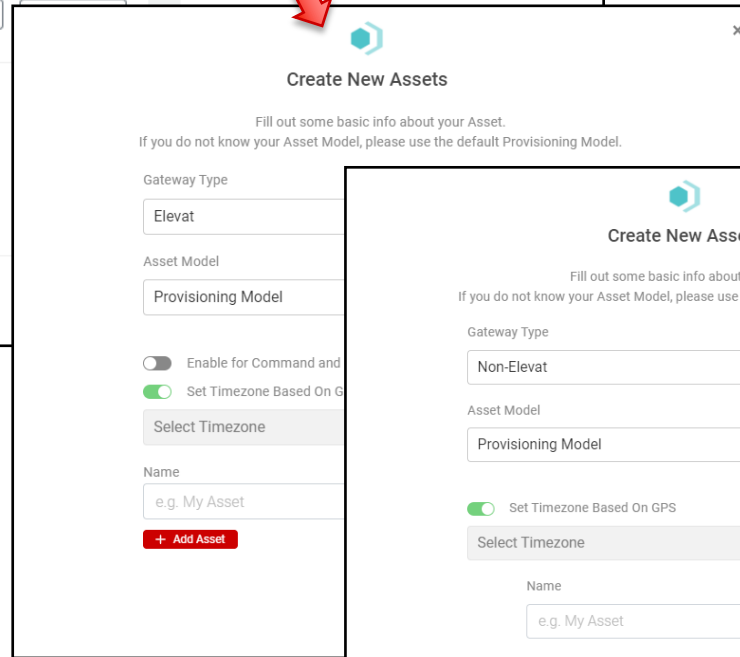

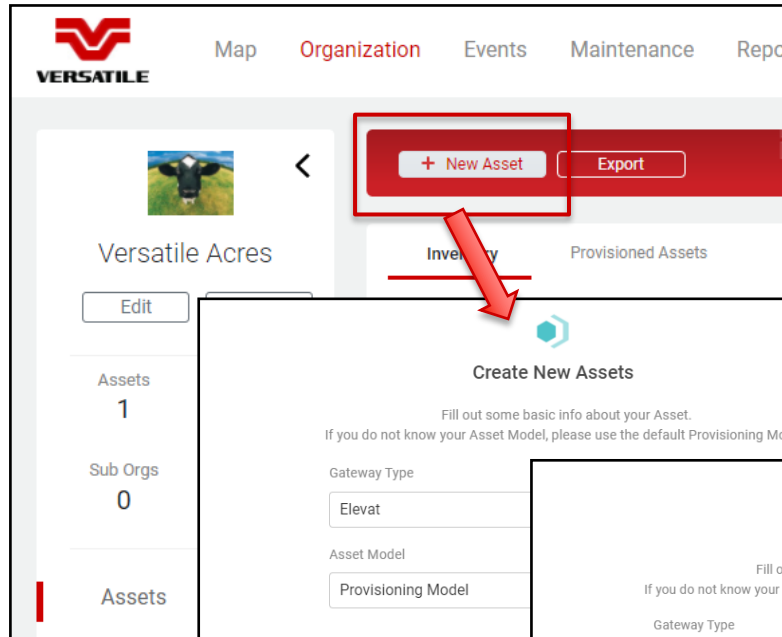

- When registering the tractor, make sure to fill in the CBX Telematics Information Form
- Your dealer will submit the form to Versatile for processing at the same time as your warranty registration
- CBX staff will then add the tractor to your account
- If you are a new user
 - Details about your farm will be used to create you Farm Organization
 - Details about yourself (tractor owner) will be used to create you user account within your farm, and your farm and user account
- You can then login to see your tractor(s) in the Portal

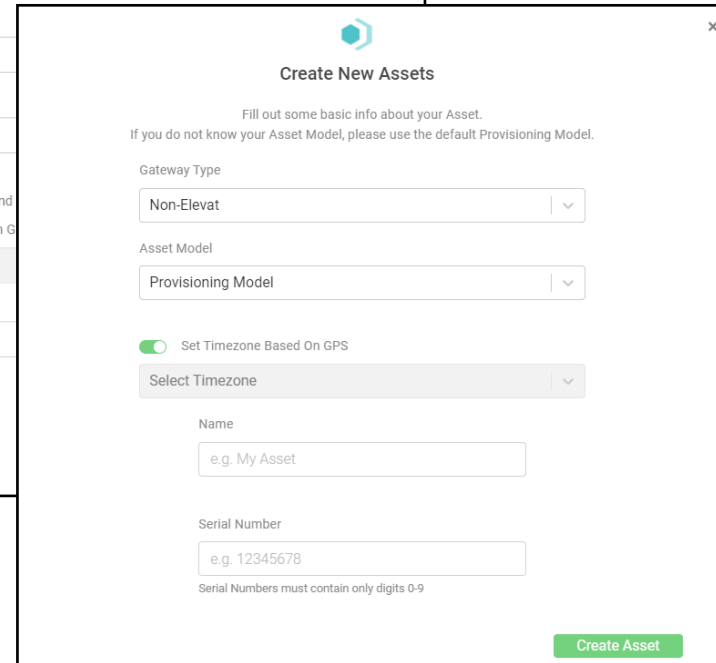

The image shows a screenshot of the 'Versatile CBX Telematics Information Form'. At the top left is the Versatile logo, and at the top right is the CBX logo. The form title is 'Versatile CBX Telematics Information Form'. Below the title are several input fields: 'Date:', 'Tractor Serial Number*:', 'Dealer Name*', 'Telematic Contact*:', 'Contact email*:', 'Mailing Address*:', 'City*:', 'State/Prov*:', 'Postal Code*:', 'Phone Number*:', and 'Cell#:'. There is a checkbox labeled 'I choose to opt out of the Telematics program.' Below these fields is a section titled 'Owner Profile for Dashboard Access' with fields for 'Registered Owner*:', 'Email:', 'Farm Name:', 'Mailing Address*:', 'City*:', 'State/Prov*:', 'Postal/Zip Code*:', 'Phone Number:', 'Cell#:', 'Warranty Start Date:', 'Signed:', 'Printed:', and 'Date:'. At the bottom, there is a box labeled 'Versatile use only' containing fields for 'Gateway Serial #' and 'Date Activated:', 'Expires:'.

How Do I Add A Non-Telematics Equipped Machine To My Account?

- Note, it is possible to add equipment that is not tracked by a telematics module
- At this point, there is no functionality that makes use of machine that does not have a telematics module

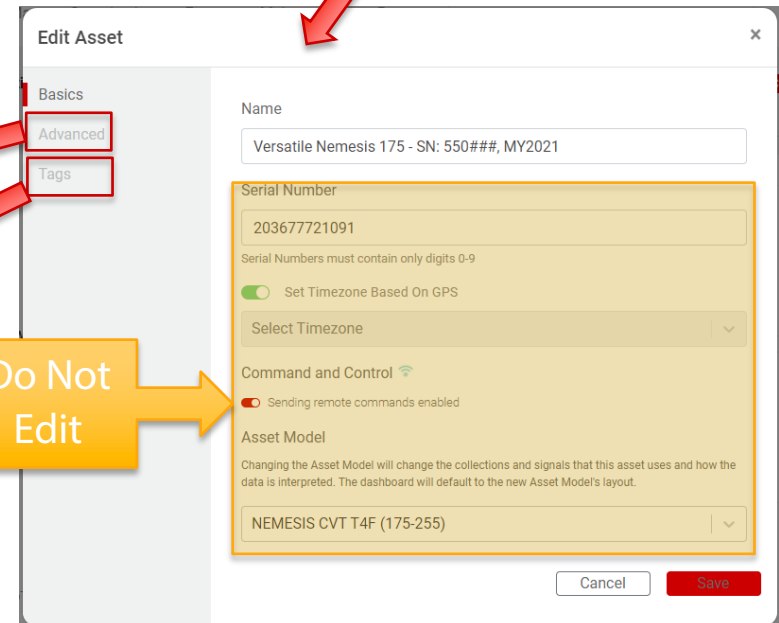

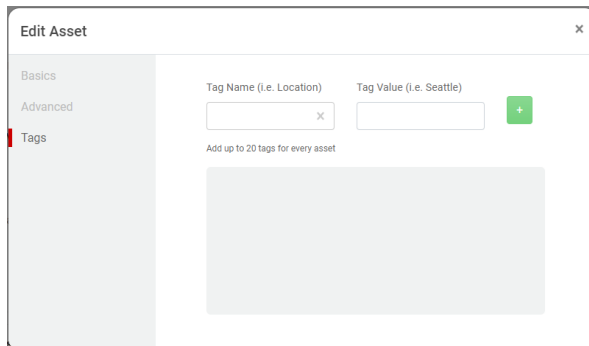

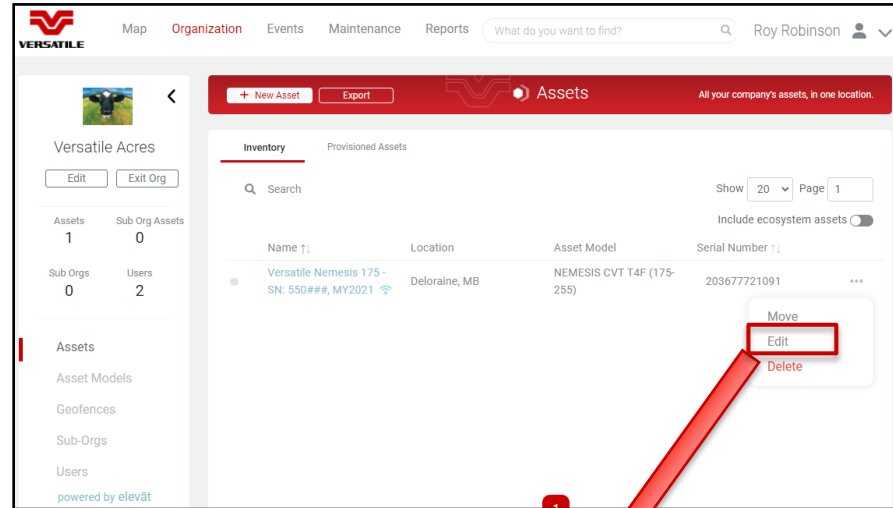

The 'Create New Assets' modal window is shown. It prompts the user to 'Fill out some basic info about your Asset.' and includes the instruction: 'If you do not know your Asset Model, please use the default Provisioning Model.' The form fields are: Gateway Type (Elevat), Asset Model (Provisioning Model), a toggle for 'Enable for Command and Control' (disabled), a toggle for 'Set Timezone Based On GPS' (enabled), a 'Select Timezone' dropdown, and a 'Name' field with the placeholder 'e.g. My Asset'. A '+ Add Asset' button is at the bottom.

The 'Create New Assets' modal window is shown. It prompts the user to 'Fill out some basic info about your Asset.' and includes the instruction: 'If you do not know your Asset Model, please use the default Provisioning Model.' The form fields are: Gateway Type (Non-Elevat), Asset Model (Provisioning Model), a toggle for 'Set Timezone Based On GPS' (enabled), a 'Select Timezone' dropdown, a 'Name' field with the placeholder 'e.g. My Asset', a 'Serial Number' field with the placeholder 'e.g. 12345678', and a note: 'Serial Numbers must contain only digits 0-9'. A 'Create Asset' button is at the bottom right.

How Do I Change A Machine's Name and Details?

- You can customize two items on your Assets
 - Name of the Tractor/Machine
 - "Tags" (custom entered info), up to 20 different user-defined pieces of info can be added for any machine (some are factory-created for you)

What Can I Do If My Tractor Isn't Visible On The Portal?

- Every tractor built by Versatile is tested at the plant before going onto a truck
- This includes connecting the telematics system to the network and checking that it is reporting tractor info correctly
- If you find that a tractor is not connecting to the telematics system correctly, there are a few things to check
 - Ensure the telematics device diagnostic lights are indicating proper power and operating state
 - Ensure that the GPS and Cellular antennas are connected properly and are working
 - Contact your dealer to ensure that the tractor has been set up in the Portal, and has been assigned to your Farm
 - Contact your dealer to ensure that your subscription is up to date
